SUMMARY

Backend-focused Software Development Engineer with 2+ years of experience designing Python-based services for payroll systems, banking integrations, ETL pipelines, and enterprise automation platforms. Built secure API-driven systems processing 400–500 payroll records per run, 40k–50k record ETL batches, and 300–400 monthly banking API disbursements. Strong experience in FastAPI, Flask, Dataverse (Dynamics 365 Web API), Microsoft Graph API, OData $batch, OAuth2, RSA/AES cryptography, and data pipelines.

EXPERIENCE

Software Development Engineer – Backend & Integrations | Gigmo Solutions Pvt Ltd

June 2023 – Present

- Architected FastAPI payroll engine processing 400–500 gig workers per run across 3–4 monthly cycles with configurable incentive and deduction logic.
- Integrated ICICI outward remittance APIs with AES/RSA hybrid encryption handling ~300–400 transactions/month, reducing payout processing TAT from 5 days to 1.
- Built Flask reverse-feed API ingesting encrypted bank transaction updates with API-key authentication, validation, and structured error handling.
- Designed ETL pipeline ingesting 40k–50k record Excel batches using Pandas, implementing validation, KPI computations (SSAT, CVR), and Dataverse OData $batch writes.
- Automated Teramind productivity ingestion pipeline processing 100–120 employee records/day, eliminating 2–3 hours/day of manual attendance work.
- Developed secure letter issuance and verification platform with RSA digital signatures, PDF hash validation, and SharePoint Graph API integration.
- Implemented OAuth2 client credential authentication, token caching, logging, retry logic, and batch API operations across multiple microservices.

CORE SKILLS

Backend / API: Python, FastAPI, Flask, REST API Design, Async HTTP (httpx), OAuth2 Client Credentials, MSAL

Data / ETL: Pandas, NumPy, Data Transformation, KPI Computation, Excel Processing, Batch Data Pipelines

Integrations: Microsoft Graph API, Dataverse (Dynamics 365 Web API), OData $batch, SharePoint Integration, ICICI Bank APIs, Teramind API

Security: RSA Cryptography, AES-256-CBC Encryption, Digital Signatures, API Key Authentication, Secure Payload Processing

Platform / DevOps: Docker, APScheduler, Logging & Observability, Retry Logic, Token Caching

EDUCATION

Master of Computer Applications (MCA) – Amity University | 2021 – 2023

Bachelor of Computer Applications (BCA) – CSJMU (Kanpur University) | 2017 – 2020
